

Interactive Projection Surfaces

INTERACTIVE Floors & Walls

Interactive floor & wall projection is a multimedia visual display system that projects incredible **interactive floor** or **wall special effects, floor games** or **floor advertisements** directly onto an interactive floor displays. Users control dynamic multimedia **interactive displays** with simple gestures and body movement. It's an engaging full-body interactive experience that immerses users in your message and endears them to your brand.

Interactive Wall

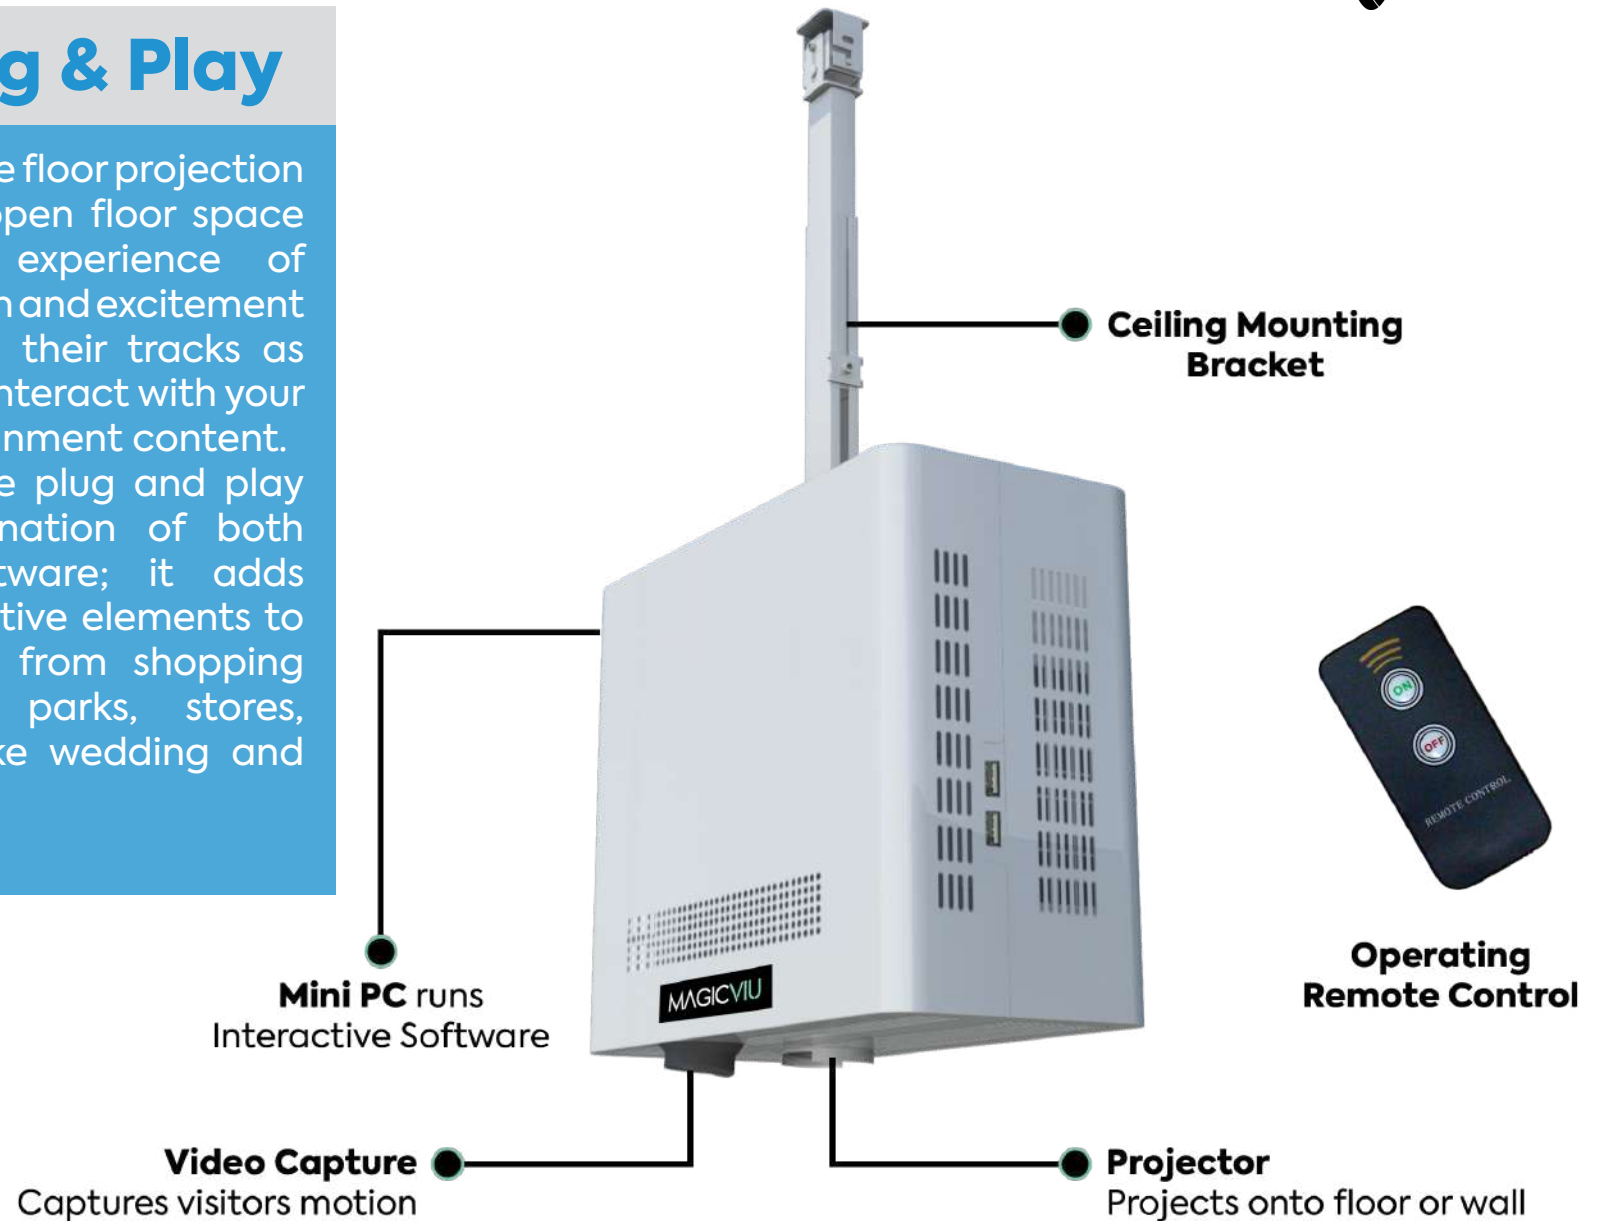

Interactive Floor

All in 1, Plug & Play

MAGICVIU interactive floor projection system easily turns open floor space into an ongoing experience of movement, action, fun and excitement attracting people in their tracks as they play, walk by or interact with your marketing or entertainment content. Our unique all in one plug and play system is a combination of both hardware and software; it adds dynamic and interactive elements to nearly any business from shopping malls, amusement parks, stores, schools to events like wedding and tradeshows.

INTERACTIVE
Wall Projection

Interactive Projection Screen Size

A standard interactive floor or wall projection kit will project a screen of an approximately 100" diagonal (220 x 125cm) using 4000 Lumens projector at 3.5m height from the ground. If the client wishes to have a larger screen, then a projector with greater lumens should be used at higher distance from the ground. A 200"- 300" screen or (440 x 245cm) and (665 x 370cm) can be achieved from 6.5m height using 5500-6000 lumens short throw projector.

Edge Blending

Edge blending software bends multiple projectors into one seamless display; each **software** package uses precision geometry correction and **edge blending** to enable flawless visuals on multi-projector displays. **Edge blending** is ideal for flat screen.

Item	Description
