3D Projection Mapping

The image shows the interior of a grand, ornate theater. The seats are red with dark wood frames, arranged in rows. The walls are decorated with intricate carvings and murals. The ceiling is high and features several chandeliers. A large, dark blue circle is overlaid in the center of the image, containing the text 'A Hologram Displays'.

# Large Scale Hologram Projection Gauze

Spectacular 3D hologram projections are created easier than ever using the ultra-lightweight and innovative projection gauze. Highly transparent and extra-wide metallic scrim for large scale 3D hologram effects. Looks so real that 3D objects appear to float in mid-air or surround a performer on stage. Projection gauze is extremely lightweight and foldable and therefore very easy to transport. It's the perfect holographic projection screen material and can be set up in no time.

70% of the dazzle expected from any show comes from the display content and not from the display tool. We design and develop 3D holographic content that catches the eye, turn heads and freezes the audience staring.

## 3D Hologram Projection Gauze

# Hologram Showcases

Catalogue Video

Designed as portable hologram machines that feature 3D content as if it were floating in air. The holographic display showcase/cabinet is a 3D platform fully integrated that combines the most advanced technologies of processing of image with a modern showcase. This allow focus the attention on the product and show to your customer in a unique way. There are not only models of hologram, but combination of real output with projections of holograms inside the case. Available in different sizes and different types of number of viewing angle.

# Rear & Front Projection Films

## Rear & Front Projection Films

Rear or front projection film is a paper-thin projection surface with integrated application adhesive for installation on glass and acrylic surfaces. All Screen Solutions rear or front projection films are designed to be projected onto with any projector type other technology that may be used as a projection source. One of many **advantages of rear projection** is that you can stand in front of the **screen** without blocking the light from the **projector** and casting a shadow on the **screen**. This gives more options for stage and room layouts and provides a more professional presentation setup. Rear projection film has a better performance in high ambient light environments than front projection screen.

Catalogue Video

Our 360 rear projection film (viewed from both sides) using one side projector (Rear) is used here on glass room walls to create an amazing show viewed from all angles & sides

## Virtual Presenter

Our rear projection film contributes in making our virtual presenter that can act like your customers service agent, speaking and delivering messages 24/7 with no mistakes or greeting your visitors up on arrival

# Cost effective Rear Projection Screen

## Rear Projection Signage

Create your own advertising signage by pasting the self-adhesive rear projection film onto the transparent acrylic panel, and installing a projector on the rear side to get a wonderful lightweight and unbreakable signage with minimal maintenance and an economical cost.

This signage can be used in your events instead of an expensive fragile conventional screen.

Video

# Rear Projection Film Gesture e-book

E-book system from ✓STUDIO is a gesture holographic new way of **rear projection** to show off your book in bookstores, at conventions, and in shopping malls, as well as your products catalogue or video. The system uses a projector and computer which are placed on the floor. The projector reads the book or catalogue from the computer, and then displays it on a clear acrylic screen. This makes it an attractive and eye catching display that can bring in new audiences for your book or catalogue and increases both exposure and sales.
