HOLOGRAM DISPLAYS

Large Scale Hologram Projection Gauze

Spectacular 3D hologram projections are created easier than ever using the ultra-lightweight and innovative projection gauze. Highly transparent and extra-wide metallic scrim for large scale 3D hologram effects. Looks so real that 3D objects appear to float in mid-air or surround a performer on stage. Projection gauze is extremely lightweight and foldable and therefore very easy to transport. It's the perfect holographic projection screen material and can be set up in no time.

Supply your business with our high-brightness LCD digital displays that work for outdoor applications in the retail, transportation and hospitality industries. Our screens provide you with content that is not hampered by lighting conditions. Approved by the German TUV Laboratory and EMC and ETL certified, our displays maximize customer engagement thanks to their durable structure and versatility.

✓STUDIO comes up with integrated solutions to remotely manage and distribute content updates. Find a model custom-fit to engage with your audience here

Transparent LCD Displays

Catalogue

Video

Transparent LCD Display Cases offer exciting new ways to engage your audience. The HD LCD technology combined with a transparent screen substrate opens up creative avenues that have never been an option with traditional LCD screens. Presenting solid black pixels on a transparent background can offer intriguing ways to deliver visual information to your audience, being used to reveal or conceal whatever is behind the screen.

The uses for this technology are limited only by your imagination. Retail windows, interactive booths, display cases, interactive games, vending machines, drinks coolers, this list goes on..

Sizes: ✓STUDIO offers transparent box display in dimensions of from 21.5" to 86", giving you great convenience to instantly showcase your star products at diverse occasions like museums, exhibitions, and boutique window decorations with the captivating motion graphics played on the outside screen. **Customized** sizes for special applications can be supplied on request

Transparent LED Screens

Transparent LED Screen is a type of LED display screen that is clear like a glass (60%-85% transparency) and has functions of an LED. It enables the viewers to see whatever is shown on the glass along with providing a complete coverage of its background as well. Since it enables audience to see what is happening behind the screen, it is also referred to as a see-through screen.

PROJECTION

Catalogue Video

Rear & Front Projection Films

Rear or front projection film is a paper-thin projection surface with integrated application adhesive for installation on glass and acrylic surfaces. All Screen Solutions rear or front projection films are designed to be projected onto with any projector type other technology that may be used as a projection source. One of many **advantages of rear projection** is that you can stand in front of the **screen** without blocking the light from the **projector** and casting a shadow on the **screen**. This gives more options for stage and room layouts and provides a more professional presentation setup. Rear projection film has a better performance in high ambient light environments than front projection screen

Our 360 rear projection film (viewed from both sides) using one side projector (Rear) is used here on glass room walls to create an amazing show viewed from all angles & sides

Our rear projection film contributes in making our virtual presenter that can act like your customers service agent, speaking and delivering messages 24/7 with no mistakes or greeting your visitors up on arrival

Catalogue

Video

Purely Projection Real sky at real time

Using ultra short projection technology we are able to fit the screen into a very low ceiling void with only 450mm between the screen and the slab above.

The projection is extremely lifelike, we can also add a 4K camera mounted on the roof of the building to show the sky outside in real time as well as 4K media player content, we can go too far and add IP cameras in other areas of Saudi Arabia and show the sky from other locations on the skylight.

The benefits of projection is that pricing is cheaper than led and the image quality is very good. Also the mounting is simpler. With LED laser light sources you can now install projection without worrying about lamps or filters needing to be changed.

3D Projection mapping

By projecting beautiful imagery over complex architecture and surfaces we create immersive content for advertising, sponsorship, national day celebrations, and other special events, as well as in permanent tourism attractions. We work with reliable projectors leasing companies in different countries to provide our customers with a full package service.
